

PRESCIO

Analytics & Financial Technology

FINANCIAL TECHNOLOGY

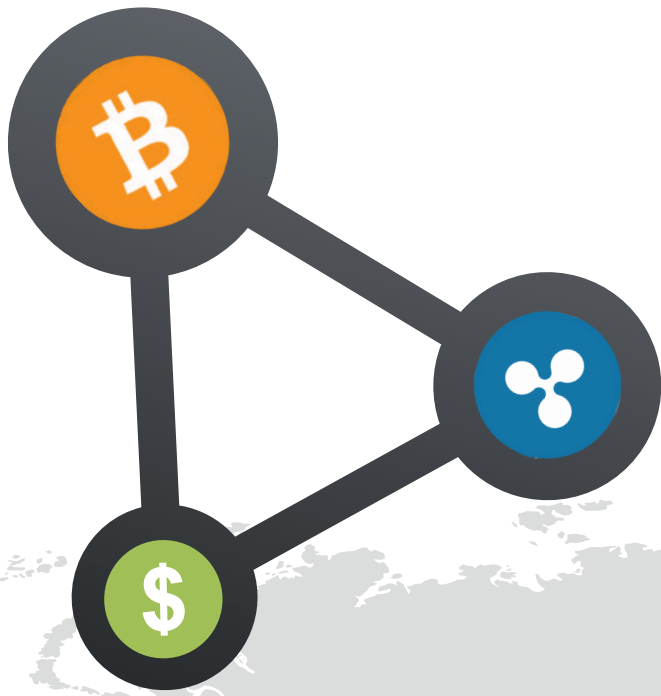

Prescio remains at the forefront of financial innovation through its internal projects, partnerships, and services focused on cryptocurrencies and blockchain technologies.

In addition to helping our clients understand and leverage emerging open source payment protocols and digital currencies, we also develop our own products independently and in partnership with organizations around the world.

To date, our main focus in this area has involved internal projects and R&D efforts related to Bitcoin and Ripple.

Prescio serves as a trusted and knowledgeable advisor in this space and assists financial institutions in their efforts to adapt to the financial innovations driven by Bitcoin, Ripple, blockchain based technology, and cryptocurrencies.

FINANCIAL TECHNOLOGY SERVICES

Bitcoin

Bitcoin serves as a global, decentralized digital currency, payment network, and public accounting ledger. Bitcoin offers a simple, quick, secure, and low cost way to move money or anything of value over the Internet. Bitcoin is currency and payments made for the digital age.

Bitcoin uses peer-to-peer technology to operate with no central authority; transaction management and the issuance of bitcoins is carried out collectively by the network. Through many of its unique properties, Bitcoin allows for exciting use cases not possible with existing, legacy payment systems.

Ripple

Ripple, like Bitcoin, is both a payment network and a digital currency protocol, with a few significant enhancements. Ripple is the first open-standard, Internet Protocol (IP) based technology for banks to clear and settle transactions in real time via a distributed network.

Banks can use Ripple to speed up payments and better secure transactions in more currencies to more markets, all with lower risks and costs. Ripple can also serve as basic infrastructure technology for interbank transactions— a neutral utility for financial institutions and systems.

THE VALUE OF PRESCIO

- ▶ We are your partner and resource for a wide range of financial and technical solutions
- ▶ We help your business minimize operational costs
- ▶ We help you run your business more efficiently
- ▶ We help you assess and manage risk
- ▶ We remain cost-effective
- ▶ We remain flexible and accessible
- ▶ We remain stable and focused
- ▶ We maintain an experienced and knowledgeable team
- ▶ We complement and add value to your existing team
- ▶ Committed to researching, developing, and testing new concepts, ideas, and technology

Prescio is an analytics and financial technology consulting firm with decades of combined experience in risk management, financial modeling, systems and IT, data administration, and software development.

Partner with Prescio to develop technical business solutions and outsource or complement your existing team. Our talented analysts, engineers, and consultants are ready to assist you with your next project.
